

Alex Morgan

Senior Data Scientist

Toronto, Canada | alex.morgan@email.com | linkedin.com/in/alexmorgan

Summary

Data Scientist with 6 years of experience building production-grade machine learning systems across fintech and e-commerce domains. Proven expertise in NLP, deep learning, and MLOps. Passionate about turning complex data into actionable insights and delivering scalable AI solutions.

Technical Skills

Languages: Python, SQL, Scala, R, Bash

Machine Learning: scikit-learn, PyTorch, TensorFlow, XGBoost, LightGBM, Keras

NLP: BERT, Transformers, LangChain, spaCy, NLTK, LLM, Generative AI

Data Engineering: Spark, Kafka, Airflow, dbt, Pandas, NumPy

Databases: PostgreSQL, MongoDB, Redis, Snowflake, BigQuery

Cloud & DevOps: AWS, Docker, Kubernetes, GitHub Actions, CI/CD

Visualization: Power BI, Tableau, Matplotlib, Plotly, Seaborn

Tools

Jupyter, VS Code, Git, GitHub, Jira, Confluence, Postman, Linux, Docker

Domains

Machine Learning, Data Science, NLP, Data Engineering, Fintech, E-commerce, Analytics

Work Experience

Senior Data Scientist — FinEdge Technologies, Toronto, Canada

Jan 2021 – Present

- Built an NLP-based fraud detection model using BERT, reducing false positives by 34%
- Led ML platform migration to AWS SageMaker, cutting model deployment time from 3 days to 4 hours
- Designed real-time feature pipelines using Kafka and Spark processing 5M events/day
- Mentored a team of 3 junior data scientists on MLOps best practices

Data Scientist — ShopStream Inc., Vancouver, Canada

Mar 2018 – Dec 2020

- Developed a recommendation engine using collaborative filtering, increasing CTR by 22%
- Built demand forecasting models with LightGBM achieving MAPE below 8%
- Automated ETL pipelines with Airflow reducing manual data processing by 80%

Education

Master's Degree in Computer Science — University of Toronto

2016 – 2018 | Specialisation: Machine Learning

Bachelor's Degree in Statistics — McGill University

Certifications

- AWS Certified Machine Learning – Specialty (2022)
- Google Professional Data Engineer (2021)
- Deep Learning Specialization — Coursera / deeplearning.ai (2020)

Projects

- Real-time Fraud Detection System — end-to-end ML pipeline on AWS
- LLM-powered Document Q&A; — RAG system using LangChain and OpenAI
- Customer Churn Prediction Dashboard — XGBoost + Power BI integration
